

Datasheet

Stand

The stand is made of aluminum profiles and the mounting plates for the marking head are made of metal.

The height of the marking head can be adjusted using a light metal rotating spindle, so that workpieces at different heights can be variably marked.

GENERAL DESCRIPTION OF THE STAND

Short specification of the stand

Weight	28.2 kg
Dimensions [L x W x H]	382.5 x 410 x 919 mm
